SUMMARY

I'm a full-stack engineer with **10 years** in PHP and Node.js, mostly on systems that run real businesses: a **wholesale distribution ERP**, two eCommerce marketplaces, delivery platforms for Korean clients and internal finance tools. I lead small teams, design the APIs and database, and still write a good share of the code myself. Since 2024 I've done most of my work with **Cursor and Claude Code**, and I set up the AI workflow my team at DOSIIN uses today.

AI IN MY DAILY WORK

~60%

less time on CRUD screens, reports and tests

15+

Skills and commands I wrote and shared with the team

8

teammates I trained to use Claude Code & Cursor

Claude Code & Cursor, every day

Cursor for work inside the editor, Claude Code for bigger jobs: new modules, refactors across many files, migrations, test suites. I ask for a plan first and read every diff before it goes in.

Custom Skills and hooks

Skills for the repetitive parts: Laravel/NestJS module scaffolding, CS-Cart add-ons, Swagger docs, PR review checklists. Hooks run lint and tests after every AI edit.

Debugging and code review

I give Claude logs and stack traces to narrow down production bugs quickly, use it as a second reviewer on PRs, and have it write tests for old code before I refactor.

Project rules the AI actually follows

Each repo has a CLAUDE.md and Cursor Rules that describe our architecture, naming and business rules, so the output looks like code our team wrote.

MCP servers

Figma MCP to turn designs into React/Vue components, Atlassian MCP to pull Jira tickets into context, and a small MCP server I built that exposes the Tabo ERP schema and API docs.

Ground rules

No secrets or customer data in prompts, and nothing gets merged without a human review. I wrote both into our team guideline.

A typical task: Jira ticket → Claude Code reads it via MCP → plan, which I check → code + tests → hooks run lint & tests → my review → pull request

TECHNICAL SKILLS

AI Tools	Agentic AI coding: Claude Code, Cursor (Agent), MCP (Figma, Atlassian, custom servers), Claude API, Skills & hooks, CLAUDE.md / Cursor Rules
Backend	PHP 8, Laravel, CodeIgniter, Node.js, NestJS, Express, REST API, queues & jobs, WebSocket, JWT / OAuth2
Frontend	React, Next.js, Vue 3, TypeScript, JavaScript, Tailwind CSS, Smarty, Figma
Data	MySQL, PostgreSQL, Oracle, Redis, Firebase / Firestore, schema design, query tuning
Cloud & DevOps	AWS (EC2, S3, RDS, Lambda), Docker, Linux / Nginx, GitHub Actions, GitLab CI/CD
Testing	PHPUnit, Jest, unit and integration tests, AI-assisted test generation
eCommerce	CS-Cart Multi-Vendor, custom add-ons, payment and shipping integrations
Ways of working	System and API design, code review, Agile / Scrum, mentoring

PROFESSIONAL EXPERIENCE

Senior Full-stack Engineer / Tech Lead · DOSIIN Co., Ltd.

09/2020 – Present · 6 yrs

Product and outsourcing company building eCommerce, ERP, logistics and fintech systems for Vietnamese and Korean clients.

- Tech lead for teams of 8 to 37 people. I design the architecture and APIs, review code and handle releases.
- Brought **Cursor (2024)** and **Claude Code (2025)** into the team, wrote the shared rules and Skills, and coached 8 developers to use them well.
- On call for production: incidents, slow queries and deployments on AWS and Linux.

Tabo ERP · Wholesale distribution system LIVE

09/2023 – Present

Outsourced project · Tech Lead · Team of 8 · 2 years of development, in production since 10/2025

- ERP for a wholesale distributor covering purchasing, **inventory across several warehouses**, sales orders, tiered dealer pricing, receivables and delivery.
- Designed the architecture (Laravel core, NestJS services, MySQL, Redis queues) and **200+ REST APIs** used by the web admin and the sales reps' mobile app.
- Built the pricing and promotion engine (agent and dealer tiers, credit limits, debt tracking) and kept stock in sync between warehouses.
- In production since 10/2025 with **300+ daily users** and **150+ distribution points**, handling about 5,000 orders a day.
- Moved the team to Claude Code for the second half of the build: CRUD screens, reports and tests took about **60% less time**. Also added a Claude API feature that answers sales questions asked in plain Vietnamese.

Laravel NestJS MySQL Redis React TypeScript AWS Docker Claude API

XT Finance & Lift Salary Advance · Fintech and HR systems

2022 – 2023

Lead Developer · Team of 10 on each project

- XT: finance modules (transactions, approvals, reports) on NestJS with a React admin.
- Lift: salary advance app with employee requests, multi-level approvals, payroll reconciliation and audit logs.
- Role-based access control and careful handling of financial data on both projects.

NestJS React Firebase AWS

Keystone of Korea · Delivery management system

2022

Lead Developer · Team of 20

- Built Node.js services for delivery tracking, with live status updates through Firebase.
- Handled AWS deployment and monitoring, and kept the system running after launch.

Node.js Firebase VueJS AWS

Lotte DMS · Enterprise delivery management system

2021 – 2022

Backend Lead · 37-person project team

- Led the backend group on delivery, dispatch and tracking modules, and designed the APIs between services.
- Planned sprints and releases together with the frontend, QA and Korean client teams.
- Reworked heavy queries and background jobs, cutting peak-time API response times by about 60%.

Laravel Node.js Firebase VueJS AWS

Dosiin & CHUS · eCommerce marketplaces

2020 – 2021, maintained since

Senior Full-stack Developer · Team of 8

- Customized CS-Cart Multi-Vendor for a fashion marketplace (Dosiin) and a local-products marketplace (CHUS).
- Wrote custom add-ons, payment and shipping integrations, and Vue storefront features.
- Sped up product pages and checkout with caching and query fixes.

CS-Cart PHP MySQL Smarty VueJS

Web Developer / Team Lead · STARBOARD ASIA Co., Ltd.

09/2019 – 09/2020

- Led development of a music social network with posts, video and music uploads, photos, comments, likes and sharing.
- Built web apps for fishery data calculation and business management, from database to UI.

Laravel CodeIgniter VueJS MySQL

Web Developer · MTV G.M.E Co., Ltd.

08/2017 – 08/2019

- Built modules for a hospital statistics and reporting system used by internal staff.
- Tuned Oracle queries and report logic so large reports loaded faster.

C# Angular Oracle

Web Developer · AZTECH Co., Ltd.

03/2016 – 08/2017

- Built an SMS marketing system for business customers and CMS admin features for eCommerce clients.
- Made custom WordPress websites for clients.

PHP CodeIgniter Laravel MySQL WordPress

EDUCATION & LANGUAGES**Ly Tu Trong College**, Ho Chi Minh City · Automotive Engineering Technology

2011 – 2014

Web Design Course, Nhat Nghe Education

2015 – 2016

English · Good at reading and writing technical documentation; basic spoken communication
